Culture of Gladiolus

Select a sunny location on good soil and plant from four to five inches deep, the largest bulbs the latter depth. Thorough cultivation is the secret of fine flowers. Never allow a crust to form and cultivate as soon as practicable after each rain in order to conserve the moisture. Will flower from sixty-five to ninety days, according to variety.

Coleman Quality Counts

We have exhibited at the Ohio State Fair the past two years and swept the platter both times, winning Sweptakes and First Prize Display on Gladiolus blooms in the very strongest competition.
